EXPERIENCE

Frontend Engineer

Carbigdata

11/2024 - Presente Localização

Descrição da Empresa

- Built and scaled frontend products with React, TypeScript, and performance-oriented architecture for AI and Big Data solutions used by banks and insurers across Brazil.
- Restructured the frontend architecture and data flow, improving performance and response times across core platform journeys by more than 70%.
- Delivered a computer vision solution for preliminary vehicle damage assessment, helping support more than R\$500K in seed investment.
- Implemented MFA and SSO authentication to meet strict security and reliability requirements for financial-sector clients.

Frontend Developer

Bsoft

10/2019 - 11/2024 Localização

Descrição da Empresa

- Refactored and modernized legacy frontend applications, reducing technical debt and creating a stronger foundation for product evolution.
- Built standardized components and interfaces to simplify maintenance, improve consistency, and enhance the user experience.
- Contributed across the full development lifecycle, from requirements to production, delivering features with a strong focus on quality, predictability, and usability.

IT Support Analyst

Municipality of Ponta Grossa

10/2018 - 10/2019 Localização

Descrição da Empresa

- Provided remote and onsite technical support, resolving incidents involving systems, devices, and business applications.
- Configured equipment and devices in line with software standards and information security policies.
- Trained users and supported continuous improvements in technical support processes.
